DISCO FLOTANTE

- » Aprobados TÜV
- » Remachados acero inox
- » Disco interior de aluminio
- » Acero de alta resistencia 35HRC, endurecido y templado
- » Superficie con acabado exclusivo para reducir la vibración
- » Anticorrosión

DISCO FIJO

- » Aprobados TÜV
- » Acero de alta resistencia 35HRC, endurecido y templado
- » Superficie con acabado exclusivo para reducir la vibración
- » Anticorrosión

ESPECIAL BMW

Discos de freno

Para optimizar un sistema de frenos BMW, TRW Lucas ofrece una serie de diferentes discos de freno. Además de intercambiar la variante de discos rígidos, los discos de freno completamente flotantes “SP” o “RAC-SP” otorgan un rendimiento óptimo y una vida útil larga para las carreras. Todas las variantes de los discos de freno se ofrecen con un contorno exterior redondo o con un diseño RAC deportivo. Todos los sistemas tienen en común una desaceleración perfecta y un rendimiento optimizado.

Con los kits de fijación

Con ayuda de accesorios de sujeción de alta calidad es posible reemplazar los discos originales a un bajo coste.

Prensados, como los originales

Quién prefiera atornillar los discos con casquillos ya prensados, puede elegir la variante basada en los discos originales.
